

# WHY USE DRONES?

## Rapid Output:

Our lightning-fast drone spraying technology blankets a significantly larger area in a fraction of the time compared to traditional methods.

## Efficient Delivery:

Improved precision minimises paint waste, optimising the distribution of sprayed product leading to cost savings over manual spraying.

## Pinpoint Precision:

More accurate in delivering product than manual spraying, targeting exactly where it's required.

## Health & Safety:

Fully autonomous drones remove the huge risks involved in having workers on top of a glass greenhouse.

## Consistent Finish

Drones provide a far more consistent shading finish which makes removal so much easier at the end of the season.

## Easy Reach:

Drones are the perfect solution for structures such as polytunnels that are very hard to reach with traditional spraying / cleaning methods.

## Versatile:

Speedy, nonintrusive solution for Seeding, Sowing, spraying and pellets distribution ideal for frictionless farming and forestry application.

# WHY USE QUADROTOR SERVICES?

## Professionalism

We are a highly professional and fully insured company.

## Approved

We don't just contract, we are also an approved XAG drone reseller.

## Results

With nearly 2 years' experience in this very new market we have testimony from many satisfied clients as to our work ethic and quality results.

## Transparent

Our proposals clearly layout the exact scope and work to be carried out including graphic mapping of the area to be sprayed and a detailed risk assessment.

## Availability

We have a fleet of drones and pilots strategically placed around the country to ensure a speedy scheduling of jobs.

## No cutting corners

Our operations director has the coveted qualification to be able to fly within 15 metres of the clients neighbouring buildings. \*

## Pilots

Our pilots are all fully trained, qualified and insured to fly as well as being self-sufficient in mixing products to the correct ratios and site set up, ensuring a safe and efficient job. Additionally, some pilots have licences for handling a cherry picker/platform/fork lift truck.

## Confidence

QRS is supported by Dejex supplies, East Riding Horticulture and BHGS. Our combined expertise and impeccable reputations enable us to deliver exceptional service, and our partnership is a resounding endorsement, showing the confidence in the on-going success of QRS.

## Flexible Payment

We have introduced 3-year fixed contracts so payment for growers can be spread over the three years, scheduling can be pre-arranged, so growers can focus on their core business.
