

100c Ethylene protection

Treatment with Florissant 100C will protect the flowers through the whole supply chain and will result in a longer vase life with the consumer. Florissant 100C protects flowers from ethylene damage both internal and external. Florissant 100C has been one of the most effective treatments against ethylene for more than 30 years and is used by flower growers all over the world.

Effects

- prevents petal drop
- enhances full growth
- prevents shrinking
- extends vase life
- ensures better colour

For

Carnation
Lily
Alstroemeria
Delphinium
Gypsophila
Phlox
Veronica
Asclepias
and other ethylene sensitive flowers

Usage

For optimal results, flowers must be treated with Florissant 100C solution directly after cutting. Flowers should be on the solution for a minimum of 4 hours and a maximum of 72 hours. Florissant 100C can be re used up to 7 days.

Dosage & Packaging

Use 0.5 ml or 1ml per litre water. Available in 5ltr cans.
